inTouch Automation

Pool and Spas have evolved and can be complicated. The expectation of today's pool owner is that the automation included with their pool allows everything to be operated intuitively and by the touch of a button. We know it's never quite that simple however, Insnrg's inTouch automation focuses on making three key areas as simple as possible.

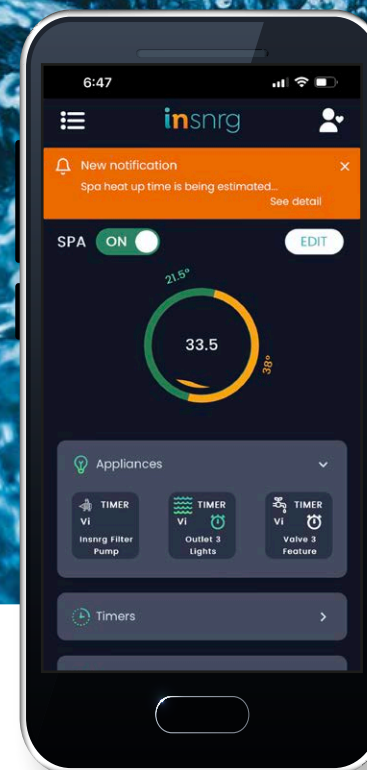

- Installation – Set the whole system up from your phone or Smart Device. Assign outlets, valves, temperature sensors, then set up timer periods, chlorine and pH, pretty much anything required is completed by the App. With more features than any other system, the inTouch App makes owning a pool and spa fun.
- Operation – so intuitive and stable, the inTouch app is easily set up and allows the new pool owner complete control of their pool with minimal training
- Ongoing maintenance – the Business User access allows real time information, scheduled system reports to check on the status of all parts of the filtration, heating, and chlorination system

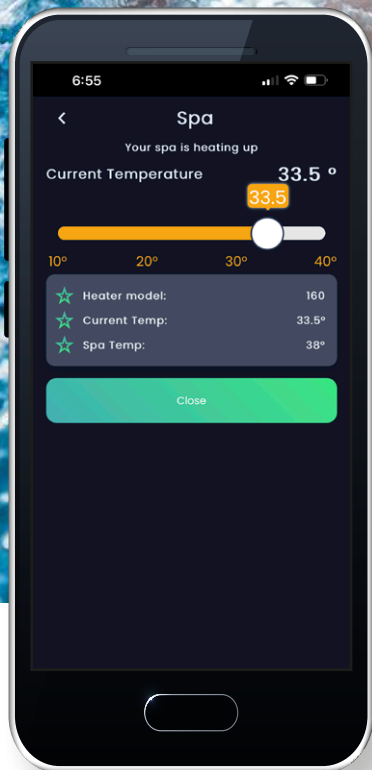

Set the whole system up from your phone, tablet or computer.

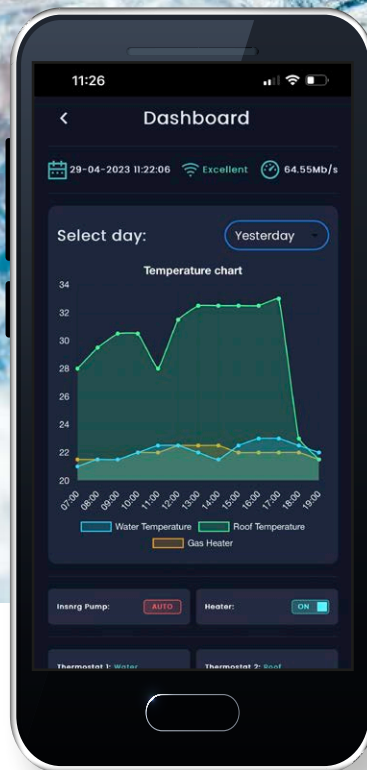

Editable home screen, hide unused icons or make other appliances front and centre. Set favourites and appliance rules that ensures the correct combination of appliances work at the same time.

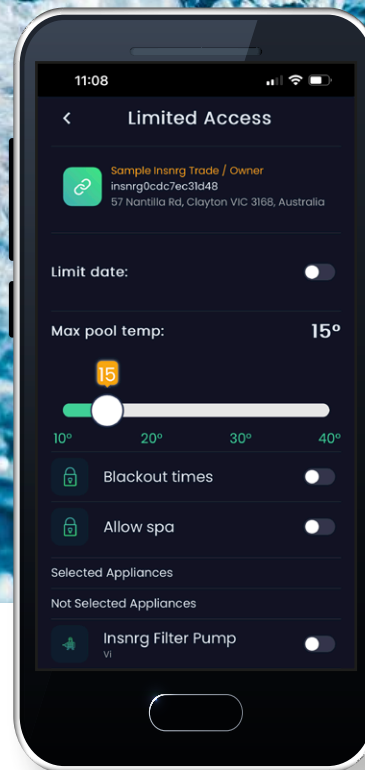

Turn the Spa ON and inTouch will calculate the heat up time.

Watch the progress of the Spa Heating.

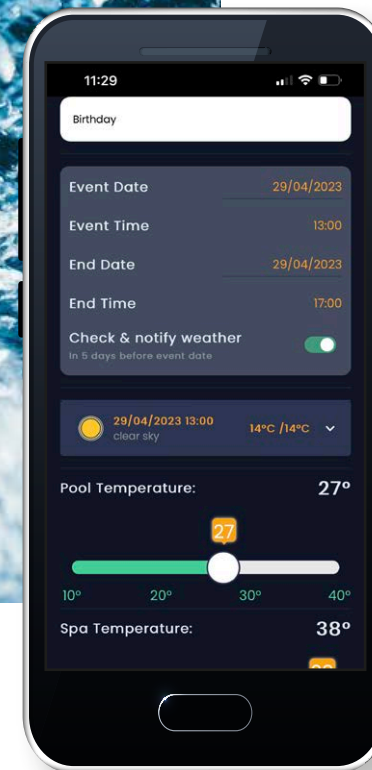

inTouch Dashboard graphs water temperature, roof temperature, displays system status and even tells the owner when service is required.

Guest Access allows the pool owner to share the pool with guests, tenants and friends with limited access by:

- Start and end date
- Maximum Temperatures
- Blackout time to prevent late night parties
- Exclude appliances that shouldn't be played with

Plan an event and pre plan spa and pool temperatures, what appliances are ON and when the event finishes.

inTouch will automatically calculate when to start heating to reach the perfect temperature at exactly the right time.

Qi Variable Speed Pump

The Filter pump is the heart of your pool and spa system. Operating 8 or more hours a day, 365 days a year, there are few appliances that work as hard. The Qi Variable Speed Pump has been designed to do all this with the following features:

- Silence - the Qi is one of the quietest pumps on the market
- Low energy consumption - efficient electronic control and motor design minimises your power consumption and carbon footprint
- Made to last - heavy duty components for years of service

> FULLY VARIABLE SPEED

Tailored performance for best filtration and lowest operating costs

> QUIET

Low noise, inoffensive sound, one of the quietest pool pumps

> DURABLE

Built to last

> WARRANTY GUIDE

3 Years, 1 year Mechanical Seal

Why variable speed?

Flexible and versatile, the variable speed pump can be set for the ideal filtration flow rate, often a much lower flow than what is required for cleaning your filter or vacuuming your pool. Lowering your filtration flow rates dramatically reduces the water pressure and operating costs. A reduction in speed by 30% will reduce your water flow by 30%, ideal for sand or glass filters, but reduce the system pressure by 50%. Even better this 30% reduction in speed will reduce the power consumption by around 75%.

- Select ideal flow for filtration and skimming of pool surface area
- Lower system pressure and extend life of other components
- Reduce your power consumption by up to 85%
- Environmentally friendly, lowers carbon emissions by up to 85%
- Reduced noise pollution, set to run extended hours while whisper quiet
- Flexible, increase speed for spa jet operation, water features or pool cleaners
- Set ideal flow for heat pump or gas heater operation

DESIGN & ENGINEERING

- Intelligently designed motor and controller air cooling minimises component temperature rise, even on the hottest of days.
- Heavy duty engineering plastics minimises damage from impact, transport and during installation.
- Electronic hardware and firmware design produces smooth and quiet motor operation while allowing full inverter control
- Ramp on lock ring enables fast lid removal and reassembly to clean leaves and debris out of basket
- The basket is large and robust reducing cleaning and cannot be accidentally put in the wrong way.
- Inlet weir enables fast, efficient priming without affecting the flow rate or pump performance.

Si Pool and Spa Pump

The Si Pool and Spa Pump is available in a range of sizes with the ideal flow rate for your application. The unique design includes an internal weir to provide exceptional priming performance and a moulded handle to assist in installation. The high quality components are specified to withstand the harshest environmental conditions and provide high performance resulting in a long lifespan.

> POWERFUL OPERATION, YET QUIET

Unique design resulting in high flow rates and quiet operation

> DURABLE

Built to withstand the harshest environmental conditions

> POWER PRIME

Unique internal weir design minimise wear on moving parts

> WARRANTY GUIDE

3 Years, 1 year mechanical seal

Si PUMP - FLOW CHART

Ci Cartridge Filter

The Ci Cartridge Filter is a single element filter available in 4 sizes to ideally suit any pool demand. The quality of the elements has been carefully researched and chosen to the highest standards to ensure long-life and fine filtration.

The unique single piece tank that also includes an internal weir results in optimum water flow and reliability due to no glue joints.

- **DURABLE**
Single piece moulded tank made from reinforced materials
- **LOW MAINTENANCE**
Unique internal weir design extends life and minimises cleaning
- **EASY TO USE**
Large handles and convenient lock ring
- **WARRANTY GUIDE**
5 years Tank, 1 year Element

UF Ultra Fine Filter

The UF Filter removes the finest of particles from your pool water creating the clearest, safest water in which to swim. Using Perlite to coat the filter element, particles as small as 1 micron are filtered out of the pool. At this size, the UF filter is 20 to 30 times more effective than a glass or sand filter and 15 times more effective than a conventional Cartridge Filter.

Removing the ultra fine organic material from your pool helps prevent algae growth and other transmittable pathogens by removing the food that they need to multiply. The consequence is lower chlorine consumption, less balancing chemicals and a lower cost to operate.

Perlite is a naturally formed and mined volcanic glass media and is graded to ensure the correct size perlite particles are used for your pool filtration system. To use Perlite, Mix 1.5 kgs of perlite in a bucket of water and slowly pour into your pool skimmer while the pump is running after the filter has been cleaned. Generally this process should take place every 3 months – depending on the pool usage and environmental factors such as dust and leaves.

- **ULTRA FINE**
filters down to <3 micron
- **UNIQUE WEIR**
extends life of filter element and distributes Perlite evenly
- **WARRANTY GUIDE**
5 years Tank, 1 year Element

Li & Di Filter

The larger the filtration area, the longer time between cleaning. The Li Cartridge Filter range has four elements that potentially requires cleaning only once a year (depending on the size and use of the swimming pool). The high quality, durable tank ensures longevity even in the harshest environmental conditions.

For exceptional water clarity, the Di filter can be purchased and used with Diatomaceous Earth (DE) or Perlite to filter the finest of debris from the water. This results in the safest and healthiest swimming water.

- **SAVES WATER**
Reduced cleaning saves up to 7,000 litres of water a year
- **SAVES ENERGY**
Low pressure drop enables more water flow and reduced pump operating hours
- **GREAT QUALITY WATER**
Filters smaller particles than conventional filters
- **WARRANTY GUIDE**

Mi Sand Filter

The Mi Sand Filter is available in four models to perfectly match your pool and/or pump size. With a maximum operating pressure of 400 kPa, the single piece moulded tank provides exceptional strength to withstand harsh environmental conditions. The easy to use Multiport Valve (MPV) has lasered writing to eliminate issues with labels detaching and losing control.

The Mi tank is suitable for any filter media of your choice, including Sand, Glass, Beads or Zeolite.

> LOW MAINTENANCE

Easy to operate Multiport Control Valve for fast and easy cleaning

> DURABLE

Single piece moulded tank offers maximum strength

> SUITABLE FOR ALL FILTRATION MEDIA

Able to use preferred media option for your pool

> WARRANTY GUIDE

10 years Tank,
1 year MPV and Labour

Ni Chlorinators

Chlorinators are the choice of sanitising for most pool owners. Chlorine is a safe and reliable way to kill the bacteria and algae in your pool. So safe in fact, it is used to disinfect your drinking water and Australia has some of the purest and best tasting drinking water in the world. The Ni Chlorinator range comes in three sizes to match your water volume and bather load.

The unique design of the chlorinator cell matches ideally with variable speed pumps and can operate at lower speed levels. The reverse polarity cell reduces the maintenance by cleaning itself and almost eliminating regular maintenance on the electrodes.

Four timer periods per day can be set from the digital timeclock giving you the flexibility to chlorinate and filter your pool when the bather load is highest.

> UNIQUE CELL DESIGN

Designed for todays variable speed pumps

> HIGH EFFICIENCY

Allows lower salt levels for fresh clean swimming water

> SUITABLE FOR SALT OR MINERALS

Able to use preferred option for your pool

Vi Combined Automation & Chlorination

The Vi combined automation and chlorination system is the perfect product for the pool owner who wants full control of their pool water and equipment. The Vi comes complete with pH and Chlorine sensors that fit neatly into the unique cell housing and continuously measure these important values to provide the best pool water. The in-built Acid Pump will automatically dose the correct amount of Acid depending on the level measured by the pH sensor. The chlorinator cell will function only when chlorine is required eliminating high chlorine levels.

The Vi Premium Chlorinator also comes with additional GPO sockets allows you to control other pool equipment and when connected to the (optional) inTouch Wi-Fi Portal allows complete control of your pool, lights, water chemistry from the inTouch App. Monitor and graph your water temperature, roof temperature, automatically start your spa heating or plan the perfect water temperature for your next pool party.

Three motorised valve sockets automatically redirect water to required appliances, temperature sensor sockets for heating and solar control and a voltage free contact to control your heat pump or gas heater*.

UNIQUE CELL DESIGN

Highly efficient, patented design for high output and lower salt levels

CHEMICAL SAVINGS

pH and Chlorine monitoring minimises additional chemical purchases

SUITABLE FOR SALT OR MINERALS

Able to use preferred option for your pool

WARRANTY GUIDE

3 years, 1 year Acid Dosing tubes and chlorine/pH sensors

inTouch Automation

inTouch Portal

The inTouch Portal can be connected to any Vi Premium Chlorinator, Ri Automatic Doser or inTouch Expansion Box. This will allow control of these units on the inTouch App. Once connected you can operate this equipment from the backyard or anywhere with access to data from your smart phone or device.

Expansion Relay Hub

The Relay Hub can be used as a stand alone controller, with 4 x switched GPOs and 2 x unswitched GPOs, 4 x valve actuator sockets, 3 x Voltage free contact outlets for control of heat pumps and gas heaters plus water and roof sensors. Or Data Cable to Vi Chlorinator for control of up to 9 appliances, 7 actuators, and multiple heaters.

Valves

Insnrq 2 and 3 way 50mm valves and non return valve are made from high temperature CPVC for stability under heat, teflon seal for smooth operation and are provided with stoppers for manual operation. Suitable industry standard actuators.

inTouch Relay Hub

The inTouch Relay Hub can be installed as stand alone automation system or added to the Vi Chlorinator to control additional appliances, actuated valves, temperature sensors along with pool & spa heaters.

Ri Automatic Dosing

For the purest swimming water, install the Ri Automatic Chemical Doser. To maintain ideal swimming water it is important to track and maintain your pH and Chlorine levels. The Ri Automatic Chemical Doser does this with a sophisticated probe and dosing system. No need to manually add chemicals to your pool, the Ri does it for you.

The Ri Automatic Doser takes your pool control to the next level. Not only will your pool water be always ready to swim, the Ri comes complete with additional functions which monitor and integrate with other Insrgr pool equipment.

The Ri also provides complete automation of your pool and spa system for total control. Additional GPOs, motorised valve sockets, temperature sensor sockets, contact for control of heating enable the Ri to be the heart of your pool and spa automation system*.

> PH & ORP SENSORS

Unique design with reliable and affordable sensors to maintain ideal levels on key parameters

> INTEGRATE WITH INTOUCH PORTAL

Provides full remote monitoring and control of all functionality from your smart phone

Ui UVC Pool Sanitiser

The most effective pool water steriliser you can give to your family. For the healthiest water consider Insnrg's Ui UVC Pool Sanitiser. UV sterilisation is the environmentally friendly way to kill 99.9% of all germs and algae present in your pool or spa water. Your pool and spa water will always need a residual sanitiser in the water as some of the steriliser needs to be present in the body of the water to deal with organic matter that can enter the pool. Chlorine is the most widely used steriliser but imagine if you can lower your chlorine level by up to 80%. The Ui UVC Pool Sanitiser virtually eliminates all pathogens by destroying their DNA as the water passes the UV lamp leaving very low levels of chlorine or other residual sanitisers to deal with any influx of organic debris into the pool.

> UNIQUE 2 PASS DESIGN

Compact footprint and designed for water to stay in contact with UV twice as long as conventional UV devices, also using less power.

> KILLS 99.9% OF PATHOGENS AT DNA LEVEL

Healthy and safe swimming water, eliminates 'chlorine smell'

> 80% REDUCTION IN CHLORINE DEMAND

Less chlorine and low impact on other critical parameters such as pH

Gi Gas Heater

The most dependable way to heat your swimming pool in any conditions at any time of the year is by a Gas Heater. The Gi Gas Heater has been carefully designed and manufactured to provide the most efficient way to heat your pool water. The high quality components ensure durability, reliability and reduce heat-up times whilst using less gas supply.

The compact size and lower clearances reduces the footprint of each heater to save your valuable backyard space.

Available in Natural or LPG gas units and also able to be flued for Indoor use, the Gi range is your go to choice for pool heating.

> HIGH EFFICIENCY

Quicker heat-up time and lower gas usage

> ON DEMAND SWIMMING

Fast heating gives you the choice of when you swim

> COMPACT SIZE

Smaller footprint saves your valuable real estate space

G9- Hi Efficiency Gas Heater

High efficiency condensing gas pool heater with advanced control features. UP to 95% net efficiency, the G9 gas heater reduces your gas consumption and energy costs. An inbuilt condensate pump safely removes condensate from your plant room.

The advanced double row heat exchanger and internal thermostatic bi pass valve regulate the water flow and temperature to maximise the heat transfer from the advanced continuous woven ceramic fibre burner.

When integrated with Insnrg's Vi Automation system, control your pool and spa temperatures remotely and even plan ahead for your weekend pool or spa party.

Hi Inverter Heat Pump

Heat Pumps are the most energy efficient way to heat your swimming pool water. They gain the majority of the energy from the outside air which is collected by the evaporative coils and transferred through the Mitsubishi compressor to the pool water. The Hi range of Heat Pumps come complete with the latest Inverter technology which significantly reduces energy consumption by adjusting motor speed according to water temperature. The whisper quiet operation due to the DC fan motor ensures that you can operate whenever you want to maintain your pool water temperature level.

The five sizes in the range provide the perfect choice for any pool size and application from extending your swimming season to swimming all year round.

> LATEST INVERTER® TECHNOLOGY

Quieter, more efficient, lower heating costs

> HIGH EFFICIENCY

Uses the energy from the sun to heat your pool

> QUIET

DC fan motor and inverter compressor minimises noise and optimises heating

> WARRANTY GUIDE

10 years Heat Exchanger, 2 years components

Mi Sand Filter

ITEM	CODE	DESCRIPTION
1	244400	Complete 40mm Multi-Port Valve
1	255500	Complete 50 Mm Multi-Port Valve
9	89012503	Filter Tank For Mi 250 And Mi 320 With Base
9	89012504	Filter Tank For Mi 350 With Base
9	89012505	Filter Tank For Mi 400 With Base
10	89012509	Lateral Assembly With Centre Pipe For Mi 250/Mi 320
10	89012510	Lateral Assembly With Centre Pipe For Mi 350
10	89012511	Lateral Assembly With Centre Pipe For Mi 400
11*	1172007	Laterals (115mm)
11*	1172008	Laterals (126mm)
11*	1172010	Laterals (185mm)
	919301022	Complete Replacement Top for 40mm MPV (includes Spider Gasket)
	919301023	Complete Replacement Top for 50mm MPV (includes Spider Gasket)

Notes:

11* Mi 250, Mi 320 should have 8pcs of Lateral (126mm)

11* Mi 350 and Mi 400 should have 4pcs of lateral (115mm) and 4pcs of lateral (185mm)

Vi Combined Automation & Chlorination
