

# Echolock Acoustic Enclosure

Insnrng's Echolock Acoustic Enclosures are produced to protect your expensive pool equipment significantly reducing the noise intrusion caused by mechanical devices such as pumps, air blowers and hydraulic noise from water flow.

Made from aluminium, galvanized steel and using premium Dulux powder coated materials, they are designed for life and incorporate Australian Made acoustic foam to lock the sound in the enclosure. The Echolock is precision engineered, CNC punched and folded and powder coated in Insnrng's factory in Australia.

Just like your motor vehicle, your pool equipment will last longer and operate with increased reliability when sheltered from the sun and elements.

With easy access via the gas strut supported lid and slide of rigid aluminium front door, your equipment is easy to access and service.

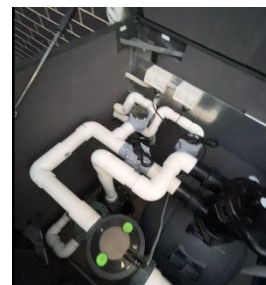

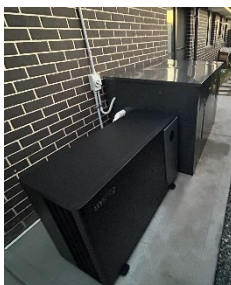

## Why choose an Insnrng Echolock Enclosure?

- Pre-treated high-quality powder coated aluminium and galvanized steel.
- Tool-free assembly, simple fast and frustration free setup. Just click and slide into place.
- Australian made acoustic insulation.
- Flat pack delivery saving freight and delivery costs.
- Easy entry for electrical services
- Aluminium mounting plate, pre-drilled for controllers, lights and automation.
- Rigid panels after assembly for vibration free operation of all equipment.
- 3 x expandable sizes to suit a range of filtration, pump and controller installations.
- Protects your pool equipment investment from the harsh Australian weather
- Made in Australia for the harsh Australian environment.

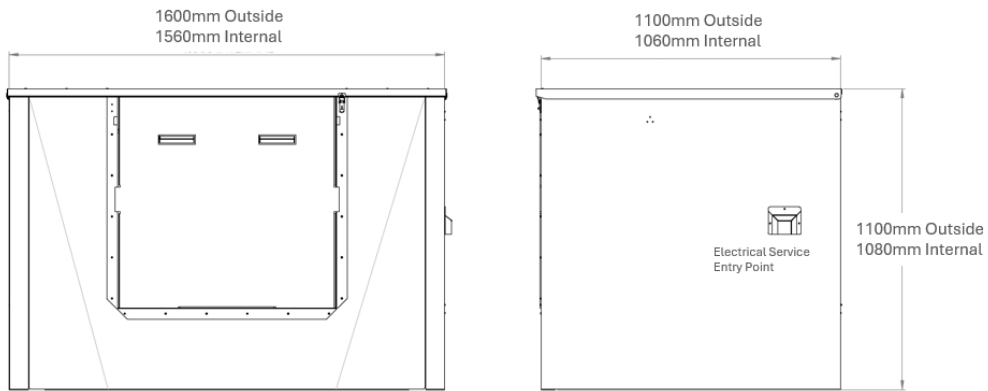

## Perfect for

- Pool Builders
- Service Technicians
- Pool Owners looking to reduce noise
